

Step 1: Create a new SwiftUI View called BeliefDecoderView.

Step 2: Copy the entire EmotionDecoderView struct INCLUDING imports (SwiftUI, UIKit, AVKit).

Step 3: Rename struct to BeliefDecoderView.

Step 4: Replace selectedEmotion with selectedBelief everywhere.

Step 5: Replace emotion list with belief categories.

Step 6: Update Step 3 to include reflection questions.

Step 7: Update Step 4 wording to 'Release the belief'.

Step 8: Update Step 5 to install new truth.

Step 9: Update completion summary to 'Belief Released'.

Step 10: Add navigation link to BeliefDecoderView.
